Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 1-13 and 16-20 are rejected under 35 U.S.C. 102(a) as being anticipated by Dow (6564762).

Figures 10-13 show a piston 81, a cylinder 79, a piston rod 83, a power gear 93, an eccentric 91, a rim gear 97, a crankshaft gear 99, a valve 73 for admitting air/fuel, and a bias member 102 urging the rim gear to the maximum stroke length.

In regard to claims 2, 3, the rod end axis 105 is located radially outward from the power gear.

In regard to claims 19 and 20, as seen in figure 13, the spring 102 will no longer provide a counteracting bias when the gear rotates so as to place the spring perpendicular thereto, which as seen in the figure is about 30 degrees.

In regard to claims 5, 6, and 10, the "stops" are deemed inherent in the linear actuator 104.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 11, 14, and 15 are rejected under 35 U.S.C. 103(a) as being unpatentable over

In regard to claims 14 and 15, the "stops" are deemed inherent in the construction of linear

actuator 104. While to degree of movement is not set forth, it would have been obvious to one of ordinary skill in the art to select such freedom of movement, 55 degrees or less, depending on the desired compression ratio response that is a function of known variables as engine speed, fuel octane, spark timing.

Limiting the stops to directly act on the rim gear would be favorably considered.

Note, claim 15 must depend on claim 14 so as to provide antecedent basis for the stops. Claim 15 has been treated as such to expedite prosecution. Correction is required in applicant's next response.
